

Important Note: All holders of a Vermont Ignition Interlock Restricted License (RDL) **must** have a **camera-equipped** ignition interlock device installed in the vehicle. When contacting an installer (or the manufacturer), you must inform them that Vermont requires a camera-equipped device. If you do not have a camera-equipped device, you will **not** be allowed to drive the vehicle until a camera-equipped device is installed.

Some manufacturers may refer you to an installer located outside of Vermont. If you wish to obtain their ignition interlock device, it is acceptable for you to use an out-of-state installer.

Holders of an RDL are responsible for **all** costs associated with an ignition interlock device. These costs may include: installation, purchasing or leasing, removal, calibrating, data retrieval, servicing and any other fees charged by the installer/manufacturer. Costs are determined by each individual installer or manufacturer.

Following is a list of Ignition Interlock Device Installers. It is your responsibility to contact an installer and to arrange for the installation of a device in the vehicle you will be operating.

IntoxaLock	Devices Offered:
Call 877-777-5020 to inquire about their installer(s) and to schedule an installation.	Camera Equipped <input checked="" type="checkbox"/> Yes
