

April news & updates

CVO Email Update - April 2020

Despite the COVID-19 situation, the planned launch of the new Commercial Vehicle Operations Online system continues to be on-track for launch on May 4, 2020. The project team is currently finishing up testing and completing end-user training.

By now, Motor Fuel taxpayers should have received a mailing with the new forms to be filed for the April/May/June periods. If you are interested in testing an upload of the motor fuel form that will be available on CVO Online, please [download the XML or Excel templates and associated instructions here](#). Once you have completed either template, please [send us the test file by email](#) and we will let you know if your submission has any issues.

In order to provide a preview of CVO Online functionality, we invite CVO customers to attend a webinar on April 29. If you are interested in attending, please [RSVP to CVO Online Webinar](#). A link to the webinar will be sent to all respondents by April 28.

For the latest announcements on how COVID-19 impacts to DMV offices and services please visit, dmv.vermont.gov/covid-19
